

INCORRECT

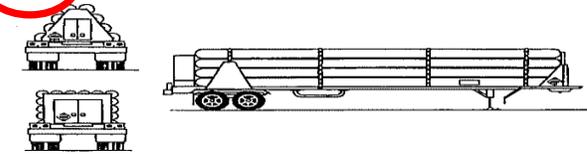

ROAD TRAILER IDENTIFICATION CHART*

137 DOT412, TC412, SCT312, MC312, TC312

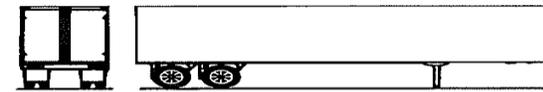

- Usually for corrosive liquids
- Circular cross-section
- External ring stiffeners
- Tank diameter is relatively small
- MAWP of at least 15 psi**

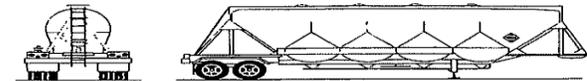

137 Compressed Gas/Tube Trailer

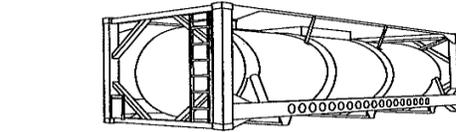

111 Mixed Cargo

134 Dry Bulk Cargo Trailer

117 Intermodal Tank

137 Vacuum Tanker

CAUTION: This chart depicts only the most general shapes of road trailers. Emergency response personnel must be aware that there are many variations of road trailers, not illustrated above, that are used for shipping chemical products. The suggested guides are for the most hazardous products that may be transported in these trailer types.

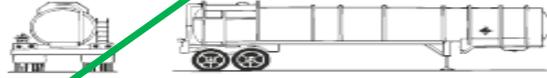

* The recommended guides should be considered as last resort if the material cannot be identified by any other means.

** MAWP: Maximum Allowable Working Pressure.
